The finality of the last Office action is hereby withdrawn. Following is an action on the merits.

Claims 1-4 and 6-19 are objected to because of the following informalities: in claim 1, line 5, -- by said cable -- should be inserted before the semicolon; penultimate line, -- of said cable -- should be inserted after "access". In claim 11 it is inaccurate to recite the swappable component as **including** (along with other things) an external memory card, since the component **is** the memory card per se. Thus in claim 11 it has been assumed that on line 4 both instances of "component" are -- external memory card --. On the last line of claim 11 -- physically -- should be inserted after "without". Appropriate correction is required.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stein 5628055.

Stein substantially discloses the claimed invention, including housing 200, swappable component 131, cable 254, pivotable access door 280, and connector 54. Not disclosed, however, is the component being an external memory card. It would have been obvious to use this type of system in conjunction with an external memory card, since it clearly would be desirable to prevent removal of same until the power

source is disconnected. Note that this claim is broad enough to allow for disconnection of the power without physical disconnection occurring (i.e. via a switch).

Claims 16-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-4, 6-10, 21, 22 and 24-31 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record, particularly Stein, discloses or teaches the claimed extension or obstruction on the door, nor a swappable component which cannot be removed unless the battery is also removed.
